Summary

I am a dedicated Front End Web Developer passionate about creating modern, responsive, and visually engaging websites. I combine expertise in HTML, CSS, and JavaScript with a strong design sense to craft functional, aesthetically pleasing interfaces. My focus is on delivering smooth, intuitive user experiences through clean, maintainable code, turning ideas into polished products that work seamlessly across devices.

Projects

myBlog (Full-Stack Blogging Platform)

A modern blogging application with authentication, CRUD features, comments, likes, following, search, and image uploads.

- **Tech Stack:** React, Tailwind CSS, Node.js, Express, MongoDB, JWT, Google OAuth, Cloudinary
